

## BULLETIN: 102/2021

### COVID-19 UPDATE – VACCINATION REQUIREMENTS FOR REOPENING

All businesses are urged to review their employee vaccination requirements against Victoria's [Roadmap: Delivering the National Plan](#).

The Roadmap provides for a progressive reopening with increased capacity limits across various settings when all attendees are fully vaccinated. This includes workers.

The option of increased capacity limits will only apply if everyone present is fully vaccinated (or has a valid medical exemption).

This means if your staff are not fully vaccinated, you may not be able to apply the increased capacity limits offered in the Roadmap. Encourage your workers to get vaccinated as soon as possible.

The Chief Health Officer has also issued vaccination requirements for many workers that must leave home to work on-site. Workers who are covered by this requirement but have not had a first and second dose by the deadlines set by the [COVID-19 Mandatory Vaccination \(Workers\) Directions](#) will not be able to attend workplaces outside their home.

For more information on the Roadmap, industry restrictions or to book a vaccination, visit [coronavirus.vic.gov.au](https://coronavirus.vic.gov.au) or call the Business Victoria hotline on 13 22 15.
